

Office of Government Affairs  
444 N. Capitol St., NW, Ste. 351  
Washington, D.C. 20001

April 24, 2015

The Honorable Eddie Bernice Johnson  
Ranking Member  
House Committee on Science, Space, and Technology  
394 Ford House Office Building  
Washington, D.C. 20515

Dear Ranking Member Johnson:

In response to the inquiry of your staff, I am writing to express Princeton University's endorsement of the position of the Association of American Universities, of which Princeton is a member, on the America COMPETES Reauthorization Act (H.R. 1806). A copy of AAU's letter, which outlines specific issues, is attached.

Thank you for your efforts on these issues.

Sincerely,

A handwritten signature in blue ink that reads "Joyce Rechtschaffen".

Joyce A. Rechtschaffen  
Director

### **AAU STATEMENT ON H.R. 1806, AMERICA COMPETES REAUTHORIZATION**

#### **AAU Opposes H.R. 1806 in Its Current Form; Legislation to Reauthorize America COMPETES Needs to Help Close the Innovation Deficit**

The Association of American Universities appreciates the House Science, Space, and Technology Committee's intention to reauthorize the America COMPETES Act, which authorizes research, engineering, and education programs supported by the National Science Foundation, the Department of Energy's Office of Science, and the National Institute of Standards and Technology.

The America COMPETES Acts of 2007 and 2010 established a unifying vision for enhancing America's competitiveness through science and innovation. Unfortunately, the bill that the Committee plans to mark up this week, H.R. 1806, falls short of the vision created by the first two COMPETES Acts.

We recognize that the overly tight caps on domestic discretionary spending imposed by the Budget Control Act make it very difficult to provide the investments in research that are needed to advance the nation's innovative capacity and global competitiveness. Nevertheless, we are disappointed in the overall level of investments in research proposed by this bill. Moreover, we are deeply concerned about proposed cuts to vital areas of research at NSF and the Department of Energy, including NSF's Social, Behavioral, and Economic Sciences and Geosciences directorates and DOE's ARPA-E, Biological and Environmental Research, and Energy Efficiency and Renewable Energy programs.

While we appreciate that the Committee has improved some of the policy provisions from legislation it approved in the last Congress, we are concerned about provisions that remain in H.R. 1806, as well as new requirements that were not included in previous bills.

For these reasons, we oppose the legislation in its current form. As this bill advances, however, we look forward to working with the Committee and others to improve H.R. 1806 so that it sustains this nation's economic competitiveness and carries forward the original vision of the COMPETES Act.

Stagnant research budgets at the COMPETES agencies and other federal research agencies, combined with the rapid increases in research funding made by our economic competitors, are creating an innovation deficit that threatens this nation's role as global innovation leader. It is vital that any legislation to reauthorize the COMPETES Act provide the investments in research that we need to close the innovation deficit.

#####

*The Association of American Universities (AAU) is an association of 60 U.S. and two Canadian public and private research universities. It focuses on issues such as funding for research, research policy issues, and graduate and undergraduate education. AAU member universities are on the leading edge of innovation, scholarship, and solutions that contribute to the nation's economy, security, and wellbeing. AAU's 60 U.S. universities award nearly one-half of all U.S. doctoral degrees and 55 percent of those in STEM fields.*
